SAMI Cortexa
Version 1.0.0 - Production

SAMI API (1.0.0)

Download OpenAPI specification: Download

Unified authentication and data synchronization for Cortexa, Sami Connectivity, and Sami Dashboard. Supports JWT authentication, OAuth2 integrations, and multi-tenant operations.

Login

Check Session

Check if the user session is still valid.

Responses

- 200 Successfully Retrieved Client Properties
- 401 Unauthorized: Invalid or Expired Token

Create Token

Sign up a new tenant and receive access and refresh JWT tokens.

Request Body application/json *

- email string *
- password string *

Responses

- 200 OK
  - access_token string
  - refresh_token string

Forgot Password

Initiate the password reset process for a user.

Responses

- 200 Successfully Requested Password Reset
- 500 Internal Server Error: Failed to Send Email

Get JWT Using Token

Retrieve a JWT token using a refresh token.

Request Body application/x-www-form-urlencoded *

- refresh_token string *

Responses

- 200 OK

Refresh Token

Refresh an JWT token using a refresh token.

Request Body application/x-www-form-urlencoded *

- refresh_token string *

Responses

- 200 OK

Web App Login

Authenticate a user for the web application.

Request Body application/x-www-form-urlencoded *

- username string *
- scope string
  Enum: "admin", "client", "guest"
- grant_type string
  Enum: "password", "refresh_token", "client_credentials"
- client_id string
- client_secret string

Responses

- 200 JWT Generated

Users

List Corporates

Lists all corporate entities with optional filters and pagination.

Header Parameters

- X-Client-Id string *
  Client ID
- X-Client-Secret string *
  Client secret for client authentication
- X-Client-Type string
  Enum: "cortexa", "sami_connectivity", "sami_dashboard"
  Client type
- X-Client-Version string
  Client version
- X-Tenant-Id string
  Tenant ID (required for non-admin user auth)
- Authorization string
  Bearer <token>

Responses

- 200 OK

Create Corporate

Creates a new corporate entity.

Header Parameters

- X-Client-Id string *
- X-Client-Secret string *
- X-Client-Type string
- X-Client-Version string
- X-Tenant-Id string
- Authorization string

Request Body application/x-www-form-urlencoded *

- name string *
- corporate_code string *
- corporate_type string *
  Enum: "OTT", "DTH"
- parent_id string
  Parent corporate ID
- is_active boolean
  Default: true
- is_deleted boolean
  Default: false
- created_at string
  Format: date-time
- updated_at string
  Format: date-time

Responses

- 200 OK
  - id string
  - name string
  - corporate_code string
  - corporate_type string
  - parent_id null | string
  - is_active boolean
  - is_deleted boolean
  - created_at string
  - updated_at null | string
- 422 Validation Error

Retrieve Corporate

Retrieve details for a specific corporate entity.

Header Parameters

- X-Client-Id string *
- X-Client-Secret string *
- X-Client-Type string
- X-Client-Version string
- X-Tenant-Id string
- Authorization string

Responses

- 200 OK
- 422 Validation Error

Update Corporate

Update details for a specific corporate entity.

Header Parameters

- X-Client-Id string *
- X-Client-Secret string *
- X-Client-Type string
- X-Client-Version string
- X-Tenant-Id string
- Authorization string

Request Body application/x-www-form-urlencoded *

- name string
- corporate_code string
- corporate_type string
  Enum: "OTT", "DTH"
- parent_id string
- is_active boolean
- is_deleted boolean
- created_at string
  Format: date-time
- updated_at string
  Format: date-time

Responses

- 200 OK
  - id string
  - name string
  - corporate_code string
  - corporate_type string
  - parent_id null | string
  - is_active boolean
  - is_deleted boolean
  - created_at null | string
  - updated_at null | string
- 422 Validation Error

List Corporate User Mappings

List all corporate user mappings with optional filtering and pagination.

Header Parameters

- X-Client-Id string *
- X-Client-Secret string *
- X-Client-Type string
- X-Client-Version string
- X-Tenant-Id string
- Authorization string

Responses

- 200 OK
- 422 Validation Error

Create Corporate User Mapping

Create a new corporate user mapping.

Header Parameters

- X-Client-Id string *
- X-Client-Secret string *
- X-Client-Type string
- X-Client-Version string
- X-Tenant-Id string
- Authorization string

Request Body application/x-www-form-urlencoded *

- user_id string *
- corporate_id string *
- role_id string *
- is_active boolean
  Default: true
- is_deleted boolean
  Default: false
- created_at string
  Format: date-time
- updated_at string
  Format: date-time

Responses

- 200 OK
- 422 Validation Error

Retrieve Corporate User Mapping

Retrieve details for a specific corporate user mapping.

Header Parameters

- X-Client-Id string *
- X-Client-Secret string *
- X-Client-Type string
- X-Client-Version string
- X-Tenant-Id string
- Authorization string

Responses

- 200 OK
- 422 Validation Error

Update Corporate User Mapping

Update details for a specific corporate user mapping.

Header Parameters

- X-Client-Id string *
- X-Client-Secret string *
- X-Client-Type string
- X-Client-Version string
- X-Tenant-Id string
- Authorization string

Request Body application/x-www-form-urlencoded *

- user_id string
- corporate_id string
- role_id string
- is_active boolean
- is_deleted boolean
- created_at string
  Format: date-time
- updated_at string
  Format: date-time

Responses

- 200 OK
- 422 Validation Error

Policy

Fetch Policy

Fetch a policy by its id

```
GET https://api.mailjet.com/v3/REST/policy/{policyID}
```

Authentication: basic auth (username: API key, password: Secret key)

Path parameters

policyID (required)	policy's unique id

Query parameters

Accept (optional)	enum: "text/plain" | "application/xml" | "application/csv" | "application/x-www-form-urlencoded" | "application/vnd.ms-excel" | "application/vnd.ms-excel;charset=utf-8" | Response

- 200 Successful Response
- 400 Invalid Parameter
- 403 Not Allowed
- 404 Not Found
- 405 Method Not Allowed
- 500 Internal server error

List Mapped Static Fields

List static fields for mapped static lists

```
GET https://api.mailjet.com/v3/REST/mapped-static-field
```

Authentication: basic auth (username: API key, password: Secret key)

Response

- 200 OK

List Static Field Matrix

List static fields for static lists

```
GET https://api.mailjet.com/v3/REST/static-field-matrix
```

Authentication: basic auth (username: API key, password: Secret key)

Response

- 200 OK

Create Static Field Matrix

Create a field in a static field matrix (for static lists)

```
POST https://api.mailjet.com/v3/REST/static-field-matrix
```

Authentication: basic auth (username: API key, password: Secret key)

Body application/x-www-form-urlencoded

Name (required)	Name of the field
ID_DataType (optional)	ID of the data type, default: 1 (str)
Priority (optional)	Order of field in the matrix, default: 0

Response

- 200 OK

Create Static Field Matrix Policy

Create a policy on a static field matrix (for static lists)

```
PUT https://api.mailjet.com/v3/REST/static-field-matrix/{ID}/policy
```

Authentication: basic auth (username: API key, password: Secret key)

Path parameters

ID (required)	ID of the static field matrix

Body application/x-www-form-urlencoded

Action (required)	Action to take when a new field value is received. Allowed values: "create" | "block" | "ignore"
Priority (optional)	Order of field in the matrix, default: 0

Response

- 200 OK

Retrieve Static Field Matrix

Retrieve static field matrix (for static lists)

```
GET https://api.mailjet.com/v3/REST/static-field-matrix/{ID}
```

Authentication: basic auth (username: API key, password: Secret key)

Path parameters

ID (required)	ID

Response

- 200 Successful Response

Create Static Field Policy

Create a policy on a static field (for static lists)

```
PUT https://api.mailjet.com/v3/REST/static-field/{ID}/policy
```

Authentication: basic auth (username: API key, password: Secret key)

Path parameters

ID (required)	ID of the static field

Body application/x-www-form-urlencoded

Action (required)	Action to take when a new field value is received. Allowed values: "create" | "block" | "ignore"
Priority (optional)	Order of field in the matrix, default: 0

Response

- 200 OK

Create Static Field Similar Policy

Create a similar policy (on static field matrix and static field)

```
PUT https://api.mailjet.com/v3/REST/static-field/{ID}/similar-policy
```

Authentication: basic auth (username: API key, password: Secret key)

Path parameters

ID (required)	ID of the static field

Body application/x-www-form-urlencoded

Action (required)	Action to take when a new field value is received. Allowed values: "create" | "block" | "ignore"
Priority (optional)	Order of field in the matrix, default: 0

Response

- 200 OK

Logout

Web App Logout

Logout user and close session

```
GET https://app.mailjet.com/signout
```

Authentication: basic auth (username: API key, password: Secret key)

Response

- 200 Successful Response
